

A Guide to Building Your Cloud-Powered Accounting Firm

April 21, 2021

The move to the cloud has been on accountants' minds for years, but fear of change has blocked many firms from moving forward. However, we're at a historic crossroads, where accounting firms have the momentum and opportunity to decide their future.

In this guide created for accountants, CPAs, and bookkeepers, take a dive into the realities of today's market and learn how to ride the wave of change to a treasure trove of new opportunities enabled by cloud technology.

What You'll Learn

- How accounting can prepare you for the "Next Normal"
- How your firm can successfully transform to a digital practice
- Practical ways the cloud helps firms grow and increase profits (including calculators to run your own numbers!)
- How one business switched to the cloud and grew approximately 30% year over year
