Choose Security Over Convenience Every Time

March 19, 2020

Our job is to make the best security that the industry has to offer available. We also believe it is our responsibility to educate you on how this security works — and warn you of the inherent risks in not using it properly.

We strongly recommend NOT turning off any security controls so that individuals may work from home using personal devices that are not compliant.

At one of our nation's most vulnerable times, the bad actors are extremely active. It is not a time to panic or abandon the security measures you have worked hard to implement. In fact, this is why these measures were put in place. For our clients, we recommend if employees do not have a compliant device at home, they should be using their virtual desktop — the Private Cloud Platform, otherwise known as their Remote Environment.

We will always make it our first task to educate and inform you of risks associated with a request that could put you at risk. We wish you and your firm, family and loved ones health and safety during these trying times. If you have any questions, please reach out to us at info@rightsize-solutions.com
