

# Cybersecurity Risk Survey

October 26, 2022

Take stock of your firm's current security posture, identify key areas of risk, and assess your appetite for exposure. Swizznet's Cybersecurity Risk Survey helps to gauge how cybersecure your firm is and gaps that should be addressed.

From employee training to multifactor authentication, the survey identifies critical security areas that are key to your firm's security plan. Then, identifying current risk level can help to prioritize the elements that require immediate attention and help to formulate an action plan to secure your data.

[Download](#) the Cybersecurity Risk Survey today and begin the journey to a more secure workplace.
