

# Do the RSS Five

April 9, 2020

Maybe you've seen Google's COVID-19 PSA 'Do the Five'? If not, some good advice and here's the [link](#).

We've adapted this for our own "Do the RSS Five" mantra:

1. **Use** MFA & Watch for Phishing Emails
2. **Adhere** to your Compliance Policies
3. **Communicate** Communicate
4. **Execute** on your DR plans
5. **Refine** and Repeat what's working what's not fix it

To learn more, listen to a replay of our most recent educational 'What You Need to Know about Working Remotely' webinar. Our panel discusses why best tech management practices become even more critical in the evolving work-from-home business environment. At one of our nation's most vulnerable times, the bad actors are extremely active. Gain insight on how your security should work — and the inherent risks in not using it properly.
