

# Swizznet Offers Accountants Secure Client Communications with Liscio

March 24, 2022

Swizznet has expanded its offering of business solutions to include [Liscio](#), the provider of a modern, secure mobile solution for file sharing and client communication that transforms the way accountants and their clients work together.

Swizznet provides outsourced information technology (IT) management and cloud-based technology solutions to accounting firms and small- and mid-size businesses. The company's robust offering of business solutions includes accounting software and application hosting, CRM tools, IT services management and cybersecurity protection – in particular, SwizzStack, which delivers enterprise-level technology services, security and support.

With Liscio, accountants can securely communicate and exchange information, eSignatures and documents quickly and easily with clients, without needing to go in and out of multiple applications. Clients can scan and send documents as high-quality PDFs to their accountants directly from their smartphones, while Real Time Messaging provides a secure and instant connection. Integrated and compliant eSignature capability allows for capturing signatures directly and securely using a mobile device. Client-facing tasks keep them on track and auto-reminders take the burden of chasing down overdue items off accountants.

Now, firms can purchase and enlist support for Liscio from the Swizznet Obsessive Support® team.

"Swizznet is passionate about offering world-class tools and applications that enable accounting firms and other enterprises to do business easily and securely," said Bob Hollander, Swizznet president and chief executive officer. "Liscio's exceptionally high standards for serving clients well and their passion for innovation mirror our own, making them a perfect complement to our offering."

Swizznet's client service commitment – its 24/7/365 Obsessive Support® promise – means that businesses of all sizes can expect a premium service experience typically reserved for larger, enterprise-level organizations.

"Liscio offers a new way for accountants to communicate and securely share documents with clients – it's unlike anything that's available," said Chris Farrell, Chief Executive Officer of

Liscio. “Swizznet’s outstanding staff and their commitment to service make them a terrific partner.”
