

# Construction Owner FAQs for a Cloud Computing Managed Services Provider

*Over the years, Visory has worked with many construction companies, and we have compiled a list of the most frequently asked questions.*

**What type of cloud computing solutions does your company provide, and how can they benefit my construction company?**

**How do you ensure the security of my company's data when it is stored in the cloud?**

**Can you help my company comply with industry-specific regulations and standards?**

**What type of support do you offer in the event of a technical issue or outage, and how quickly can I expect a response?**

**How can your solutions help my company improve communication and collaboration among employees and stakeholders, both in the office and in the field?**

**Can you provide examples of other construction companies you have worked with and the results they have achieved with your services?**

**How do you handle scalability, and can you accommodate my company's growth and changing needs over time?**

**What type of training and education do you provide to ensure my employees can effectively utilize your solutions?**

**How do you handle backups and disaster recovery, and what is your plan in the event of a data breach or other emergency?**

**Can you help my company integrate our existing applications and systems with your solutions, or do we need to migrate everything to your platform?**

# Our Answers to Those Questions.

We provide a variety of cloud computing solutions, including infrastructure as a service (IaaS), software as a service (SaaS), and platform as a service (PaaS).

## Yes we can.

Our solutions can benefit your construction company by improving collaboration among employees, increasing productivity, reducing IT costs, and providing flexibility and scalability. We have experience working with almost all construction software.

## It's Serious.

We take data security very seriously, and we use a variety of measures to ensure the security of your company's data in the cloud. This includes encryption, firewalls, intrusion detection and prevention, and regular security audits.

## Compliance?

Yes, we can help you comply with industry-specific regulations and standards. We have experience working with companies in various industries: construction, wealth management, accounting, law, and small & medium-sized businesses. We understand the importance of compliance.

## Obsessive Support®

We offer 24/7 support to our clients, and we strive to respond to all technical issues and outages as quickly as possible. We understand that time is of the essence in the construction industry, and we are committed to minimizing downtime and disruptions to your business.

## Efficiencies.

Our cloud computing solutions can help your company improve communication and collaboration by enabling employees to access their files and applications from anywhere, at any time, on any device. This can help streamline project management and improve efficiency.

## Brain Trust.

We work daily with construction clients, and our President, Brett Helgeson owned a very successful construction company prior to joining Visory. Our solutions have helped these companies increase productivity, reduce IT costs, and improve collaboration among employees and stakeholders.

## Flexible.

Our solutions are designed to be scalable and flexible, and we can accommodate your company's growth and changing needs over time. We can easily add or remove resources as needed, and our solutions can be customized to fit your specific requirements.

## Hand Holding.

We provide comprehensive training and education to ensure that your employees can effectively utilize our solutions. This includes online training resources, onsite training sessions, and ongoing support and guidance.

## We have your back.

We handle backups and disaster recovery by utilizing redundant systems and regular data backups. In the event of a data breach or other emergency, we have a comprehensive disaster recovery plan in place to minimize downtime and protect your company's data.

## Applications.

Yes, we can help your company integrate your existing applications and systems with our solutions. We understand the importance of leveraging your existing investments in technology, and we will work with you to ensure a smooth integration process.
