TOP TECHNOLOGY RISKS FACING CONSTRUCTION FIRMS

Protecting Projects. Payments. People. Profitability.

BUILD PEOPLE PROJECTS POSSIBILITIES

A STRONGER TOMORROW BUILDS ON A SECURE TODAY.

1 PAYMENT & INVOICE FRAUD

A fraudulent email changes banking information or redirects a payment.

BUSINESS IMPACT

- Lost funds
- Project delays
- Vendor disputes
- Reduced profitability

ASK YOURSELF

How do we verify payment & banking changes before money moves?

2 RANSOMWARE & OPERATIONAL DISRUPTION

Critical systems become unavailable when employees need them most.

BUSINESS IMPACT

- Work stoppages
- Delayed projects
- Missed deadlines
- Unplanned recovery costs

ASK YOURSELF

If our systems went down tomorrow, how quickly could we recover?

3 COMPROMISED EMAIL ACCOUNTS

An employee account is hijacked and used to impersonate trusted individuals.

BUSINESS IMPACT

- Fraudulent payments
- Data exposure
- Customer confusion
- Operational disruption

ASK YOURSELF

Could one compromised account impact the business?

4 FIELD DEVICE & JOBSITE EXPOSURE

Laptops, tablets and mobile devices connect across jobsites and public networks.

BUSINESS IMPACT

- Unauthorized access
- Lost project information
- Security gaps
- Increased attack surface

ASK YOURSELF

Are field devices protected and managed the same way as office devices?

5 THIRD-PARTY & VENDOR RISK

Subcontractors, vendors and partners may have access to systems, files or sensitive information.

BUSINESS IMPACT

- Shared exposure
- Data compromise
- Compliance concerns
- Increased operational risk

ASK YOURSELF

Who outside our organization has access to critical systems and data?

Technology risk is business risk.

Protect projects, payments, people and profitability.
